

GRAND i10

5-Door

Drive with flair.

Put some flair into your driving day with the new Grand i10 5-door hatchback. You get cutting-edge style, zippy performance and impressive operating economy—everything you have ever wanted in an A-segment family car. Young car buyers will love its advanced connectivity features: an 8-in multimedia touch screen that pairs effortlessly with smartphones and a Type-C USB connector for quicker recharging. Dynamic and distinctive, the new Grand i10 is setting new standards in the small car segment.

Design

Grand i10 gets you started on your next road adventure in bold, exciting style. Every details amplifies the driving fun factor. It sports edgy-looking 15-in alloy rims, and a larger, bolder glossy black radiator grille that commands instant attention. LED-lights add a note of high-tech sophistication while the two-tone paint treatment creates a distinctively modern appearance.

15" alloy wheels

Space

Grand i10 has a way of exceeding your expectations. The two-tone interior color scheme, the stylish use of accents, and pleasing textures make the cabin space feel more spacious and more comfortable than you would expect of an A-segment runabout.

Footwell lighting

Performance

Step on the pedal, and the Kappa powerplant responds with a satisfying surge of power that will make you smile. It features all-aluminum construction for weight-saving, a tuned air intake system to improve engine breathing, and Continuously Variable Valve Timing, all of which contribute to high fuel efficiency.

5-speed manual transmission

Unsurpassed for simplicity, economy and pure driving fun, this standard gearbox delivers buttery-smooth shifting and has a clutch pedal that is light and precise.

4-speed automatic transmission

For drivers who demand maximum convenience, Hyundai offers the optional 4-speed automatic: It's reliable, quiet and efficient.

Safety

Grand i10 keeps you safe with dual airbags that we hope you will never need. They are the depowered type that deploy much more gently to reduce the risk of injury. Anti-Locking Brakes are standard but are also available with Electronic Stability Control and Hill-start Assist Control as a bundled option. Other useful safety features like Tire Pressure Monitoring System and Parking Assist make your daily driving life much easier.

Anti-lock Brake System / Electronic Stability Control

By pulsing the brakes up to a dozen times per second, ABS prevents the wheels from locking up and skidding so you can retain full steering ability and directional control. ESC works with ABS using throttle and brake intervention to help prevent the loss of directional control.

Hill-start Assist Control (HAC)

Starting from a stop on a hill can be an anxious moment due to the fear of rolling back, but HAC ends driver anxiety by automatically holding the brakes until you press on the accelerator pedal.

Rear Parking Assist System

When maneuvering into a parking spot, bumper-mounted sensors will provide you with greater peace of mind by alerting you with a series of beeps to let you know when you're getting too close.

Rear view camera with guidelines

When backing up, the dynamic guidelines help you avoid unintended bumps, nicks, and scratches and lower your stress level when parking.

Tire Pressure Monitor System (TPMS)

To extend the life of your tires and achieve optimal fuel economy, TPMS will alert you when the pressure in a tire falls below the recommended minimum.

Dual airbag system

Airbag deployment releases tremendous energy, but Grand i10's airbags are the newest depowered type, so they're gentler but just as effective in reducing the risk of injury.

Features

Projection headlamps

LED Daytime Running Lights (DRL)

Outside mirrors & repeaters

Heated side mirrors

Electric folding mirrors
