We have a passion for progress.

The “can-do” spirit is at the heart of Hyundai’s heritage. It’s the attitude of progressing, no matter what. From humble beginnings, this vision has driven us to seek new challenges, encapsulated since our founding in the name ‘Hyundai’ – meaning ‘modern times’.

It’s the persistent curiosity for what lies ahead. Of always chasing the next. What was once a man’s desire for better is today the ethos of an entire company. As our founder said: “How does one know it’s impossible if one hasn’t tried it?”

Progress doesn’t happen by chance. We’re always pushing the borders of the possible, building tomorrow’s technology today, and powering the future with an ever-evolving range of zero-emission engines, seamless in-car connectivity and more.

We’ve come a long way. And we won’t stop here. Next awaits.

Creating a new definition of timeless.

Taking inspiration from the past to design for the future.

Inspired by the original Hyundai PONY and evoking a daring spirit, IONIQ 5 reflects Hyundai's 45-year journey to become an integral part of popular culture, creating a common thread from past to present and through to the future.

Reimagined for the future.

IONIQ

With its electrifying design and advanced innovations, IONIQ 5 is changing the way people look at electric cars.

This is the perfect embodiment of innovative concept car design with amazing performance, environmentally-friendly materials and an astonishing array of smart technology.

A commanding view.

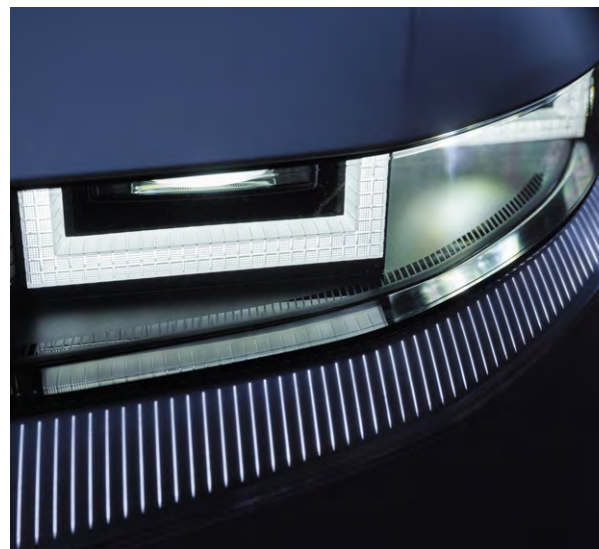

Bold. Unique. Pure.

Exploring a new design freedom.

IONIQ 5's captivating design is a refreshing take on electric vehicles, stripping away all complexity.

Smooth and seamless with a strong focus on minimalism, Hyundai's first-ever clamshell hood spans the entire width of the car – minimising panel gaps for a clean, high-tech look.

Precisely modelled surfaces and shapes give IONIQ 5 an angular, almost geometric appeal. Taut and perfectly proportioned, the side graphics are highlighted by flush door handles that vanish to enhance the clean look and aerodynamics.

The crowning glory of the striking front-end is those distinctive LED headlamps with their 256 Parametric Pixels – unique jewel-like design elements.

Aero-optimized wheels further echo the 'Parametric Pixel' design theme.

Live. Drive. Work.
Relax.

Welcome to a whole new in-car experience.

Featured for the first time with IONIQ 5, and the basis for all future Hyundai EV models, our dedicated new EV platform gives us the opportunity to re-imagine our interiors and offer a new level of roominess, versatility, convenience and tranquility.

A flat floor with front seats that can be fully reclined¹ and a flexible centre console that can be slid effortlessly back between and behind the front seats², all make for an extraordinary experience and maximise the sheer sense of openness.

¹ Premium relaxation seats part of optional Tech pack for Ultimate trim only.

² Sliding centre console available on Ultimate trim only.

Designed to handle everything you and your busy life can throw at it, the versatile IONIQ 5 offers plenty of room for passengers and luggage, providing you with a generous boot capacity of 527 litres. With the 60:40 foldable seats folded down and 1,587 litres of space available, IONIQ 5 can accommodate everything you need for a weekend escape or bring back that large piece of upcycled furniture from the restorer.

What's more, environmentally-friendly materials like eco-processed leather and recycled yarn are used throughout, adding to the sustainability credentials of our manufacturing processes.

A silver Hyundai IONIQ 5 is shown from a rear three-quarter perspective, driving on a wet asphalt road. The car's rear features a full-width LED light bar with the 'IONIQ 5' text integrated into the center. The license plate area also displays 'IONIQ 5'. The car is moving quickly, as evidenced by the motion blur on the road surface and the background. The sky is overcast with soft clouds.

Next level electric performance.

Equipped with cutting-edge technology for intelligent driving.

With excellent driving dynamics and impressive acceleration, IONIQ 5 is a game changer. To meet your mobility needs and performance aspirations, IONIQ 5 is available with a range of configurations. Choose from two battery variants: 58 kWh (Standard Range) or 72.6 kWh¹ (Long Range). In addition to the standard 2WD versions, the 72.6 kWh battery variant is available as an AWD version with dual electric motors. Here, our signature all-wheel drive system HTRAC™ actively adjusts the driving power distribution to all four wheels to achieve optimal traction in a variety of conditions such as snow, gravel and regular road surfaces. It also improves acceleration, stability and fuel efficiency with either performance or economy in mind.

Maximise your efficiency.

Two paddle shifters behind the steering wheel allow you to choose between 4 different levels of energy regeneration when lifting off the accelerator. By pulling and holding the left paddle shifter for longer than 0.5 seconds, i-pedal driving function is engaged, increasing the regenerative braking to its maximum level. You can stop the vehicle by continuing to hold the paddle shifter. Pull and hold the right paddle shifter for longer than 2 seconds to activate Smart Regenerative Braking mode, which ensures your regenerative braking settings are optimised throughout your journey in any traffic conditions.

A large photograph showing a driver's perspective from inside an IONIQ 5. The driver is wearing an orange sweater and is driving on a racetrack. The car's digital dashboard and infotainment screen are visible, displaying various driving metrics. Overlaid on the left side of the image are two large blue text elements: '298 miles' and '5.2 seconds', each followed by a descriptive sentence about the car's range and acceleration.

298 miles
IONIQ 5 delivers an impressive range of up to 298 miles² on a single charge.

5.2 seconds
IONIQ 5 delivers a responsive acceleration from 0 to 62 mph in 5.2 seconds³.

¹72.6 kWh battery not available on SE Connect trim. ²WLTP maximum electric range for IONIQ 5 Premium 72.6 kWh 2WD. Real range may vary. ³72.6 kWh AWD battery variant.

A man with a beard is shown in profile, looking at a smartphone. The phone screen displays the Hyundai IONIQ 5 app interface, which includes a car icon, a 'Charging' status, and various vehicle control buttons like 'Lock', 'Start Climate Control', and 'Unlock'. In the background, a silver Hyundai IONIQ 5 is parked at a charging station. The scene is set outdoors on a wet pavement, with a building and a yellow graffiti wall visible in the distance.

Get going in 5 minutes

You may just have enough time for a quick coffee.

In a hurry? Add 62 miles of range to your IONIQ 5 in as little as 5 minutes¹ at an ultra-fast charging station or charge it from 10-80% in just 18 minutes.

Hyundai's world-first patented technology supports both 400V and 800V charging infrastructure without the need for additional components or adapters. This enables you to get in and out of rapid charging stations faster, as you have the flexibility of using a different charger if one is occupied.

Enjoy the speed and convenience of faster charging times.

Ultra-Fast Charging
350 kW DC station

Fast Charging
50 kW DC station

72.6 kWh Long Range Battery

- Charging 10-80% in: 18 minutes
- Range added from 5 minutes of charging: 62 miles

58 kWh Standard Range Battery

- Charging 10-80% in: 18 minutes
- Range added from 5 minutes of charging: 54 miles

72.6 kWh Long Range Battery

- Charging 10-80% in: 1 hour
- Range added from 5 minutes of charging: 17 miles

58 kWh Standard Range Battery

- Charging 10-80% in: 47 minutes
- Range added from 5 minutes of charging: 16 miles

¹72.6 kWh battery variant.

18 minutes

IONIQ 5 charges from 10-80% in less than 18 minutes when connected to a 350 kW ultra-fast charger.

Take charge with even more flexible charging solutions with IONIQ 5.

Depending on your grid connection at home or the type of charging station you have access to, IONIQ 5 gives you a range of flexible charging possibilities aside from ultra-fast DC charging.

Most of your charging will happen overnight at home, and you can schedule charging to take advantage of off-peak rates. But you can also top up whilst you're out and about at the supermarket, the gym, the cafe, or many other convenient locations. When you travel further afield you can make the most of the growing high voltage networks such as IONITY, GridServe Electric Highway, InstaVolt and BP Pulse to provide a quick boost to your range.

Plug into a wide range of charging benefits.

Charge myHyundai.

Public charging has never been easier or more accessible.

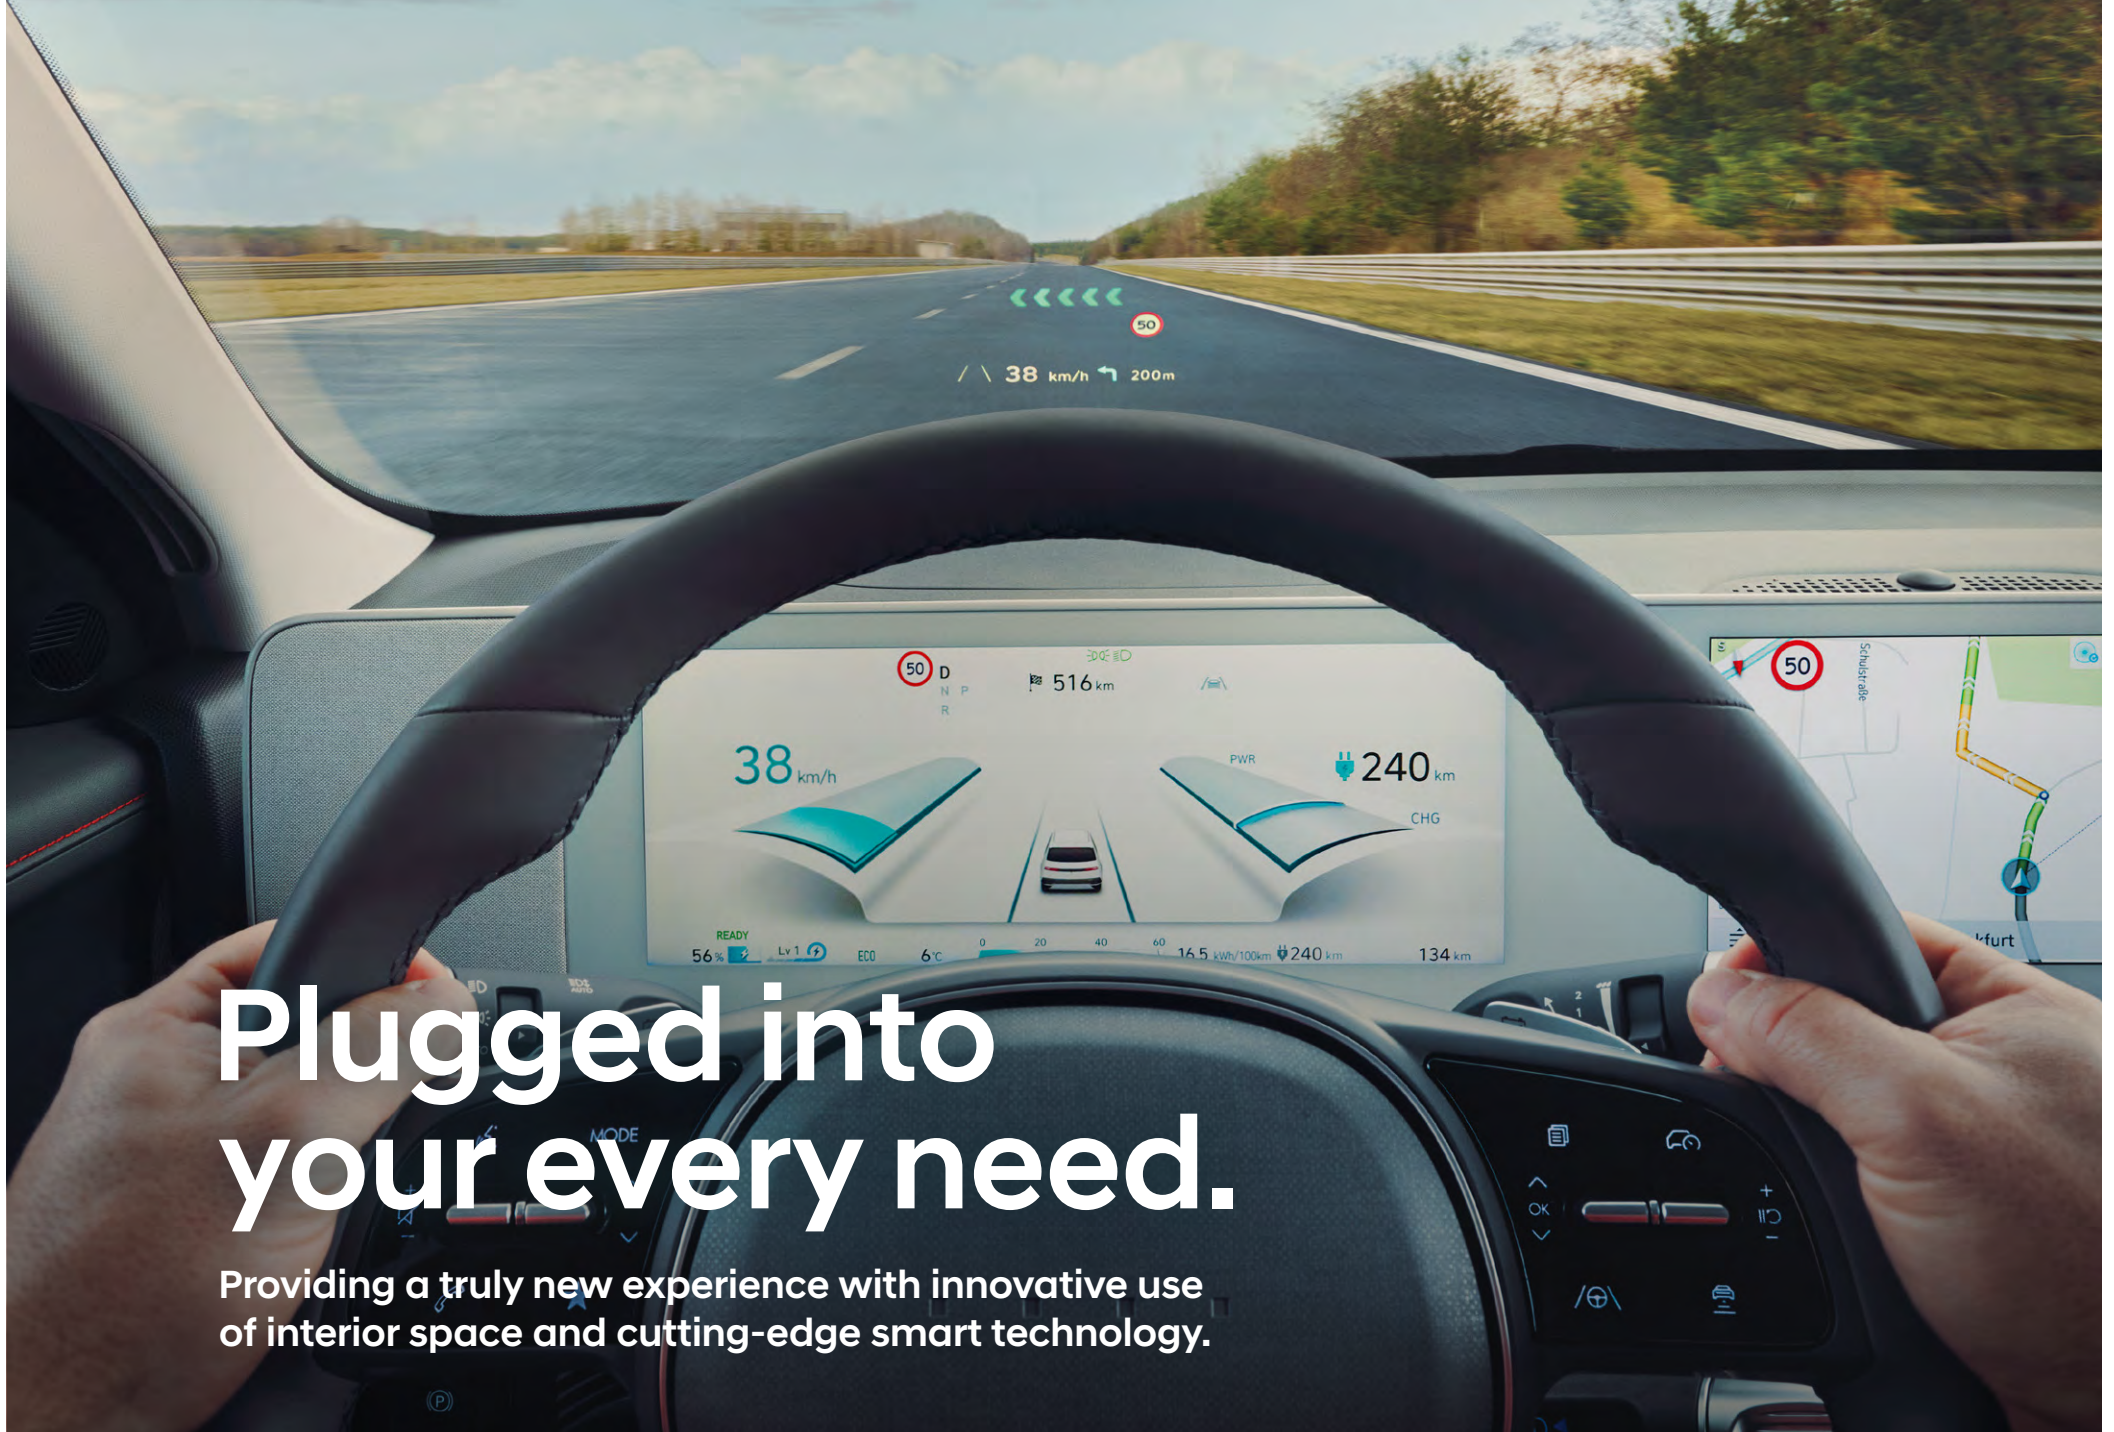

Charge myHyundai is a comprehensive and easy-to-use public charging solution that gives you access to the widest network of public charging points in the UK.

With your Charge myHyundai account, you can locate charging points, check their availability, plug in your IONIQ 5, charge and pay. All charging sessions and invoices are easy to find on the Charge myHyundai web portal or your app.

Use the Charge myHyundai app to search for charge points by plug type, charging speed and method of payment, and to access real-time updates on availability. The app also comes with a navigation function and an intelligent route planner to get you where you need to be without any kind of stress.

Get the app. Find a charger anywhere.

Plugged into your every need.

Providing a truly new experience with innovative use
of interior space and cutting-edge smart technology.

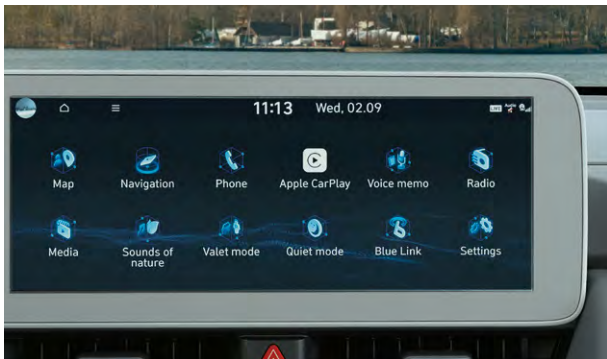

Vehicle-to-Load technology. Available on Ultimate trim.

Making life connected and convenient.

IONIQ 5 is masterful integration of digital and analogue technologies. The past, present and future have been brought together to create a dynamic driving experience. The centrepiece of the sleek modular dashboard is the extra wide integrated display which combines a 12.3” full infotainment touchscreen and a 12.3” digital cluster for a high-tech look that comes as standard. The screens display a wide range of electric car-specific information, such as battery status and nearby charging stations.

IONIQ 5 also offers you a bountiful selection of desirable connectivity features. With Apple CarPlay™ and Android Auto™, your smartphone is seamlessly synced. Wireless phone charging is another neat addition. Remain fully connected with all your favourite things through phone mirroring.

Apple CarPlay™ and Android Auto™ smartphone mirroring.

Premium Bose sound system with eight speakers. Available on Ultimate trim.

Wireless phone charging.

Plug into a world of possibilities.

Charge or power your electrical goods anywhere, anytime from your IONIQ 5.

Available on Ultimate trim, Vehicle-to-Load (V2L) enables you to use IONIQ 5's battery to power or charge any of your electric devices from the kettle to your electric scooter. The V2L function is enabled using an accessory adaptor which fits into the outside charging port.

There is also a 3 pin socket between the outer rear seats that allows you to plug and charge electronic items whilst stationary or driving.

Connect to your IONIQ 5 from anywhere.

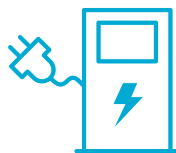

Control your car from your smartphone or your voice
with BlueLink® Connected Car Services.

With Bluelink® Connected Car Services, you're in control of your IONIQ 5 before you even leave the house.

Destination send to car.

Charging station finder.

Live Services.

Find my car.

Charging schedule.

Last Mile Navigation.

Bluelink

Before your journey.

With the Bluelink® app, the ease and joy of driving a Hyundai starts well before you're inside. The app communicates with your car, bringing you key data such as your charging schedule which allows you to program start and stop charging times, and to make sure that your car is charged when you are ready to go. You can even plan your route in the comfort of your own home or office, then send it to the navigation system in your IONIQ 5 so it's ready and waiting for you.

During your journey.

Hyundai Bluelink® Connected Car Services make driving easier and more enjoyable, without distracting you from the road. You can even control the navigation and entertainment with your voice, so your hands stay on the wheel. Get more reliable traffic and arrival time forecasting, as well as enhanced route calculations, with Connected Routing. Find charging stations, parking spaces and restaurants with Hyundai Live Services that come free for three years as part of the navigation system.

After your journey.

Your journey doesn't always end when you park. If you're in a busy city, for example, you may have to leave your car some way short of the destination. You can then use Last Mile Navigation to finish the journey on foot. If you think you might have forgotten to lock the car in the rush, you don't have to worry because your app can lock or unlock your Hyundai remotely. And, when you're returning to your IONIQ 5 after your appointment, Find My Car will guide you back to the exact spot.

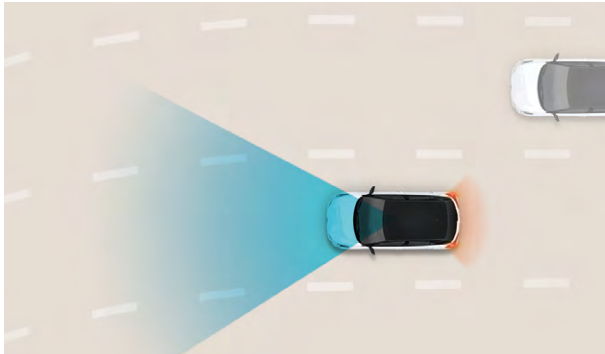

A woman with long blonde hair, wearing a beige trench coat, is standing next to a silver car. She is looking towards a young man who is wearing a green jacket and blue pants. They are both smiling and appear to be in a modern courtyard with a brick building in the background. The car is parked on a paved area, and there are some colorful objects on the ground near the car.

Protection for you and all your passengers.

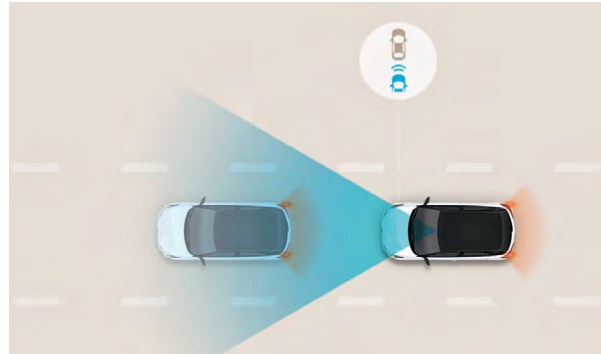

Be in control of every mile and every adventure,
with Hyundai Smart Sense safety features.

Safety and peace of mind.

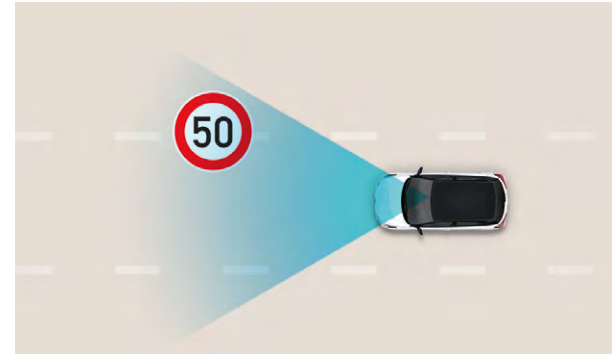

With Hyundai Smart Sense, our collection of cutting-edge Advanced Driver Assistance Systems, IONIQ 5 has been equipped with the very latest safety and driving assist features for added convenience and peace of mind. This is also the first Hyundai to feature Level 2 autonomous safety technology with Highway Driving Assist 2.

Navigation-based Smart Cruise Control (NSCC): Utilises the state-of-the-art navigation system to anticipate upcoming curves or straights on highways and automatically adjusts speed for safer driving. Also, if activated, the set speed also changes automatically whenever the posted speed limit changes.

Forward Collision Avoidance (FCA): The front view camera and radar sensors warn drivers of imminent collisions with vehicles and objects, applying the brakes when necessary to avoid collisions. The system includes Junction Assist (Turning) on SE Connect and Junction Assist (Turning/Crossing) on Premium and Ultimate.

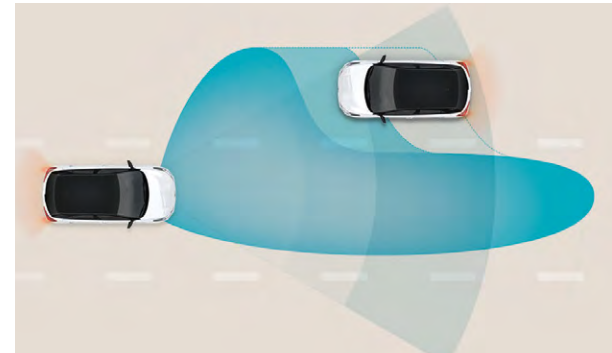

Intelligent Speed Limit Assist (ISLA): External cameras and the onboard navigation system combine to monitor road speed limits, keeping you informed via the navigation screen to keep your pace at a safe speed.

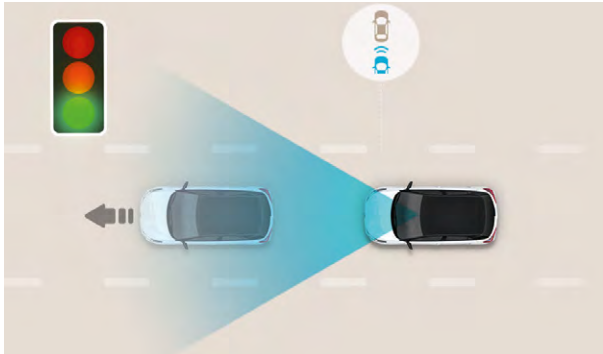

Lane Follow Assist (LFA): Smart sensors and the forward-facing camera detect when the car drifts from the centre of the lane, applying steering torque to maintain road positioning for safety. The car also estimates the trajectory of the vehicle ahead and adjusts its position accordingly.

Lane Keeping Assist (LKA): This system uses the front multi-function camera to monitor the lines of the road. In case of an unintended lane departure, it warns you and can apply counter steering torque to guide the car back to the lane.

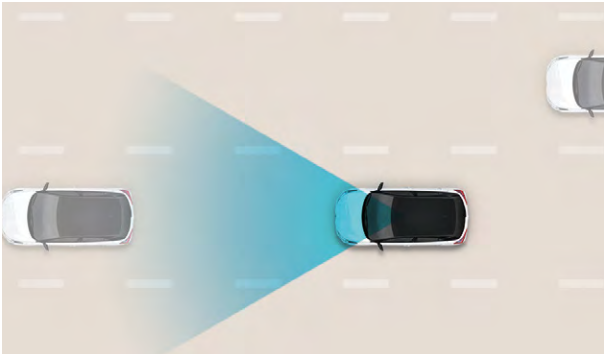

High Beam Assist (HBA): Less stress and maximum visibility. HBA not only detects oncoming vehicles but also vehicles in the same lane ahead and switches to low-beam as appropriate.

Leading Vehicle Departure Alert (LVDA): This clever feature for city driving alerts the driver when the vehicle in front departs from an idle state, like at a stoplight or in a traffic jam.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA): Perfect for car parks. When reversing out of areas with low visibility, the system not only warns the driver if vehicles approach from the side, it also applies the brakes automatically.

Highway Driving Assist (HDA): HDA Level 1 is cutting-edge semi-autonomous driving technology that keeps you centred in your lane and adjusts your speed so you are always at a safe distance from the car in front and within the speed limit. HDA Level 2, available on Premium and Ultimate, offers increased functionality. It can help you while changing lanes or during evasive driving thanks to the combination of collision avoidance assist and blind spot collision assist.

Blind Spot Collision Avoidance Assist (BCA): Radars detect traffic in the vehicle blind spot, warning drivers with an audible alarm when the indicator is used so you can be aware of the traffic around you. It will also take action itself, braking to help avoid a collision. Standard on Premium and Ultimate trims.

Driver Attention Warning (DAW): When a pattern of fatigue or distraction is identified, the system gets your attention with an alert and pop-up message suggesting a break.

Space to express yourself.

The feel good factor.

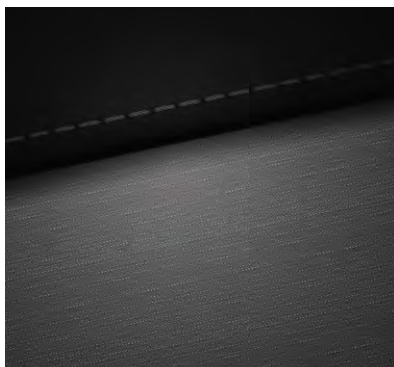

Environmentally-friendly materials have been used throughout the cabin. Choose seats covered in either comfortable cloth, or eco-processed leather that is dyed and treated with plant oil extractions from flaxseed. Raw materials extracted from sugar cane are used on the headliner, carpet and seat covers – a solution that is both pleasing to the eye and fully recyclable.

Boot liner.

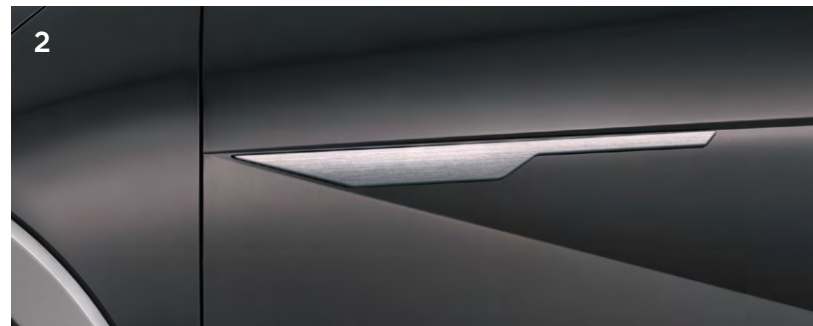

Detachable tow bar.

Dog guard.

IONIQ 5 Styling kit¹.

The styling kit consists of **1**. Door mirror caps, **2**. Side trim line and **3**. Tailgate trim line in Brushed aluminium optic.

Celebrating success.

IONIQ 5 named Car of the Year 2021 by Auto Express.

We're delighted that our commitment and ambition has been recognised at the 2021 Auto Express New Car Awards. IONIQ 5 picked up four awards – more than any other manufacturer – including the prestigious Car of the Year. Read what Editor-In-Chief at Auto Express, Steve Fowler, had to say about each award below.

Car of the Year 2021

“Our winner needs to have a huge range of talents: it should move the game on, and not just in its own segment, but in the new-car market as a whole. The Hyundai IONIQ 5 does exactly that.”

Premium Electric Car of the Year

“With the IONIQ 5, Hyundai has stepped up a level from its already highly-rated KONA Electric. Here, the Korean brand has aimed for the premium territory, and it's nailed the brief at its first attempt.”

Mid-size Company Car of the Year 2021

“IONIQ 5 takes the Mid-size Company Car crown due to the incredibly low Benefit-in-Kind rates made possible by its electric drivetrain...Even ignoring its fantastic BiK rates, the IONIQ 5 would have been a likely winner in this category; they merely serve as a bonus on an already talented and desirable company car.”

Design Award 2021

“For this year's Design Award, we offered the chance for you, the readers, to vote for 2021's most stunning new car. In the end, the win was comfortable...Eye-catching, contemporary and distinctive, it's a showcase of styling done right; retro without being overtly pastiche, unique without being fussy and, despite its size, well judged proportions.”
