

NEW THINKING. NEW POSSIBILITIES.

People's expectation toward individual mobility requires more than just a convenient means of transportation. The old understanding of cars has become outdated. A car represents individuals' lifestyles, and it became an integral part of their lives. At the same time, the automobile industry has experienced seismic change. Hyundai Motor Company has grown rapidly to become one of the largest automakers, backed by world class production capability and superior quality. We have now reached a point where we need a qualitative approach to bring bigger ideas and relevant solutions to our customers. This is an opportunity to move forward and we have developed a new brand slogan that encapsulates our willingness to take a big leap. Led by our new slogan and the new thinking underlying it, we will become a company that keeps challenging itself to unlock new possibilities for people and the planet.

NEW THINKING.
HYUNDAI NEW POSSIBILITIES.

H-100

A white Hyundai H100 pickup truck is parked in a warehouse. The truck is positioned on the left side of the frame, facing towards the right. It has a silver grille with the Hyundai logo, and a license plate that reads "H-100". The background features a wall of green storage bins and several stacks of grey plastic crates of varying heights. The floor is dark and reflective. The lighting is bright, coming from the left, creating a strong highlight on the truck's body and the floor.

WELL WORTH WAITING FOR

The new H100 has arrived and it certainly has been worth the wait. Because Hyundai knows exactly what you've been expecting in your new truck: better fuel economy is right at the top of your shopping list. So is quieter, smoother operation. And, of course, you demand outstanding versatility along with the highest standard of reliability and workmanship. Hyundai's new H100 delivers that and much more. With just one look at its refined profile and solid build quality, you can tell the new H100 represents a big step forward. Surpassing expectations: It's what Hyundai is all about. You would not expect anything less from the world's fastest-growing vehicle manufacturer of the past decade.

STYLISH, VERSATILE AND TOUGH

Every truck has its strong point. But what sets the new H100 apart from the rest of the competition is its excellence in every major category. Whatever way you look at it, the new H100 sets the standard by which all other trucks are measured. Once you get behind the wheel and take the new H100 for a drive, you'll see that Hyundai has thought of everything: You get sophisticated styling that makes a confident statement about you and your business. And along with its smart, modern styling, the new H100 delivers an equal measure of versatility and toughness. And because it's a Hyundai, you know the new H100 is very economical to own and operate. So why make compromises when choosing your next truck? The new H100 has you covered.

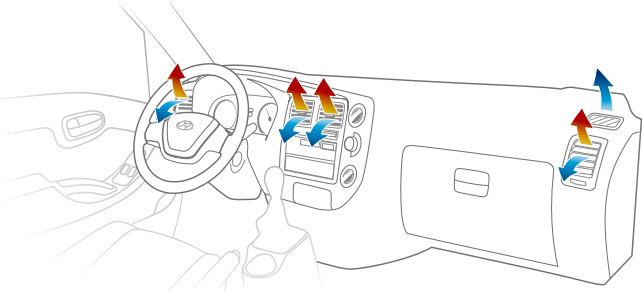

DESIGNED FOR LIFE ON THE ROAD

Life on the road can be tough at times. Nobody knows that better than truck drivers. Which is why the new, quieter and more comfortable H100 is such good news. It really does make driving a lot easier on the body and mind. For starters, the new H100 gives you an extra-roomy cabin that is now quieter than ever. And then there's the ergonomically designed seats which deliver perfect support – right where it matters most. The multi-density foam specified for the seat cushion and backrest does a lot to ease the stresses and strains of driving all day long. The optional tilt-adjustable steering wheel helps ensure the perfect driving position while the centre console and instrument cluster are perfectly intuitive to understand and operate.

INTELLIGENCE INTERFACE

Adjustable driver seat
It slides and reclines to keep you comfortable and relaxed. Lumbar support is exclusive to higher grades.

All-round ventilation
centrally mounted with easy and efficient dial controls, keeps the driver and passenger fresh and alert. Air conditioning is also optionally available.

6-speed manual transmission
Mated to the 2.5L engine, the all-new six-speed is noticeably quieter. Most importantly, the fifth and sixth overdrive gears will help conserve fuel and reduce your driving expenses.

5-speed manual transmission
Coupled exclusively to the naturally aspirated 2.6L diesel engine, the five-speed manual is notable for its remarkably smooth gear shifts, durability and low noise.

ALWAYS READY FOR DUTY

You know it's a real jungle out there: To survive in today's business world, it helps to have maximum flexibility and versatility. And that's precisely the competitive advantage of owning and operating the new H100. The new H100 is now available in a variety of different models tailored to your specific requirements. For example, the special Low Deck edition is designed especially for the easier loading and unloading of cargo. The Low Deck is available in a choice of two different wheelbases: long and extra-long. Others may find greater efficiency in the High Deck edition which is available in the long wheelbase edition only. Your Hyundai salesman will be happy to explain the specific features.

So versatile, so flexible

Choose from long or extra-long wheelbases, high or low decks.
The new H100 can be configured to perfectly suit your business needs.
Your Hyundai dealer will be happy to advise and consult on all the possibilities.

Extra LWB super cab low deck

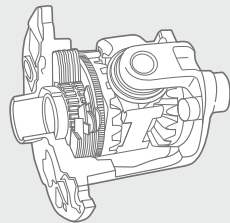

DRIVE WITH PEACE OF MIND

When you own and drive a new H100, you will be joining a very special club. What's remarkable about this community of Hyundai owners is that they are among the most loyal and the most satisfied customers in the business: It's a fact. And just why do so many choose to trade-in their old Hyundai to buy another new Hyundai? Because simply, driving a Hyundai means driving the best. They will tell you about the outstanding economy and reliability of Hyundai's diesel engines and transmissions. Others are won over by Hyundai's uncompromising approach to safety engineering. You are invited to take a closer look and understand the peace of mind that driving a Hyundai brings.

130ps/26kgm

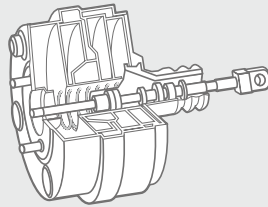

Stronger and quieter

Entering its second generation, the new A2 2.5-litre diesel engine has been substantially refined to reduce vibration and achieve quieter operation. Delivering a top output of 130ps @ 3,800rpm and 26 kg.m of peak torque over the 1,500 to 3,500 rpm range, the A2 employs a Common Rail Direct injection system and an EGR cooler which re-circulates exhaust gases back to the engine to reduce nitrous oxide pollutants. For pure economy, Hyundai offers the naturally aspirated T2. Mated to a five-speed manual gearbox and displacing 2.6 litres, it has a maximum ps rating of 79 @ 4,000rpm and produces 17kg.m. of peak torque @ 2,200rpm.

Locking Differential (LD)

When driving over soft, muddy or uneven road surfaces, you can suddenly lose traction and control of the vehicle. The Locking Differential ensures that you get maximum traction. It is automatically activated at speeds over 30kph and is more efficient than a Limited Slip Differential (LSD).

Brakes to depend on

At 15-inches, disc brakes are amply sized and they are ventilated for fade-free braking. A tandem 8+9 inch booster ensure that the stopping power of the H100 matches the dynamic performance. A front mounted anti-roll bar provides additional reinforcement for confident, precise steering and handling.

H100 in detail

When we say that the H100 was designed to set new standards for light trucks we mean it. The list of features surpasses even some well-equipped private cars, and some have never, ever been available in this class before.

Sedan-inspired cluster

Instruments that are comprehensive, easy to read and fully in vision. High quality information effortlessly and elegantly delivered is a hallmark of the H100.

Power window switch & Auto door lock

Intuitively simple to operate, these are the switches for power windows and central locking. Fine design highlights even the smallest details.

Power & Tilt steering

Precise power steering reduces driving effort, improving safety. The optional tilting steering wheel further personalises this benefit to the individual driver.

Wide view outside mirror

A useful and meaningful safety enhancement, especially when parking, wide-angle exterior mirrors provide a panoramic rear view.

Room lamp & sunglass holder

Central interior lighting with a built-in holder for the drivers sunglasses is just one more example of Hyundai's attention to detail, quality and driver well being.

Seatback console

When you fold middle seat, you can find two cup holders and tray. Further, the small box, behind the tray to open manually, is offered some space to hold maps and paperwork for convenient journey.

Audio system

An optional radio cassette audio system with high quality speakers adds yet another dimension of civility to the comfort of the H100.

Bottle storage & Door map pocket

Documents, maps, or even light refreshments are easily stored and ready for use in the door mounted storage pockets.

Lockable fuel filler cap

Protection for the fuel supply is provided by the security of a locking fuel filler cap.

Side step

Easy access speeds operations and cuts fatigue. In addition to optimally placed grab handles, the H100 offers this convenient side step.

Rear step

A rear step is placed under the cargo to make loading and unloading safer and easier.

Tailgate bolt

Secure loads are safe loads. The tailgate bolt serves to keep your cargo on the truck rather than the road.

Sidewall latch

Added side security for cargo retention comes in the form of these robust sidewall latches (Front).

Glove box

A cool box in a light truck? With the H100 naturally, while the upper tray holds personal and business items conveniently ready to hand. The integrated cup holder is detachable for easy cleaning.

Foldable stopper

Foldable long load retention pegs help keep ladders, pipes, wood and all other longer loads firmly in place.

Maintenance free battery

A positive asset in all-operating conditions, adding worry-free durability to electrical dependability.

Tool-box

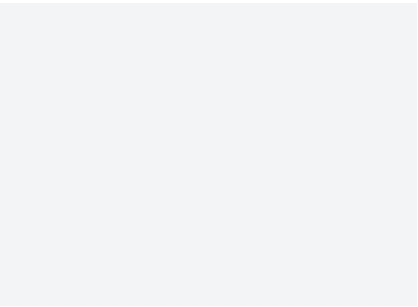

The exterior mounted toolbox is available in three generous sizes to transport and protect your tools.

Up-front easy access inspection panel

The front panel (bonnet) is designed to open easily as a passenger car which provides exceptional maintenance or emergency access.
